

Working with Older Adults: Foundational Competencies in Clinical Gerontology

Co-sponsored by: The IPA Clinical Practice and Health & Rehabilitation Sections
13 Continuing Education Credits

Presented by
Erin E. Emery-Tiburcio, PhD, ABPP
Greg Hinrichsen, PhD, ABPP

Friday and Saturday, April 5 and 6, 2019
9:00 AM to 5:00 PM

Sponsored by:
Illinois Psychological Association

About the Workshop

Every psychologist needs skills in working with older adults. The U.S. Census Bureau estimates that 22.3% of the population in Illinois will be 60 and older by the year 2030, an increase of more than 28% from 2012. Psychologists are in high demand to meet the needs of this population, but few have the necessary training. While most will not choose to attain board certification in clinical geropsychology, foundational competencies for all psychologists who work with older adults have recently been published. This workshop, offered by authors of the competencies, will provide training in the foundational knowledge, skills, and attitudes of clinical geropsychology – the critical elements of what all psychologists should know about working with older adults. Participants who complete the training will receive a certificate of completion from the Council of Professional Geropsychology Training Programs and be better prepared to meet the needs of their older adult clients.

Learning Objectives

At the end of this seminar, participants will be able to:

1. Explain how stereotypes about older adults may impact practitioners' interactions with older clients.
2. Describe at least two elements of the "life span developmental perspective."
3. Explain the difference between "fluid intelligence" and "crystallized intelligence" in older adults.

4. Explain one way in which the prevalence of most mental disorders differ between young versus older adults.
5. Identify two ways in which the presentation of mental disorders differs between older and younger adults.
6. List at least three ways in which the assessment process needs to be adapted for most older adults.
7. Identify the four most common mental health problems seen in outpatient clinical practice with older adults.
8. Identify one unique aspect of substance abuse among older adults.
9. Explain the two differences among delirium, mild neurocognitive disorder, and major neurocognitive disorder.
10. Identify four types of life problems that are a common focus of psychotherapy with older adults.
11. List three psychotherapy models that have been found to be effective in the treatment of depression in older adults.
12. Summarize at least three ways in which psychotherapy may need to be adapted for older clients.
13. Explain two ethical issues that may arise in professional work with older clients.

THE PRESENTERS

Erin E Emery-Tiburcio, PhD, ABPP

Dr. Erin Emery-Tiburcio is an Associate Professor of Geriatric and Rehabilitation Psychology and Co-Director of the Center for Excellence in Aging at Rush University Medical Center. She completed her Ph.D. in Clinical Psychology at Bowling Green State University, residency at Harvard Medical School/VA Boston, and her fellowship in Clinical Geropsychology at Long Island Jewish Medical Center. She is past-President of the Society for Clinical Geropsychology within the American Psychological Association, where she developed GeroCentral.org, a clearinghouse for geriatric mental health resources. She currently serves as Chair of the

American Psychological Association's Committee on Aging. Dr. Emery-Tiburcio is Co-Director of the Geriatric Workforce Enhancement Program of Illinois based at Rush University Medical Center, which is developing multiple educational programs for all levels of professionals who work with older adults, as well as partnering with primary care clinics across the state to transform care for older adults with multiple chronic conditions (www.catch-on.org).

Gregory A Hinrichsen, PhD, ABPP

During over forty years in the field of aging, Greg Hinrichsen has provided clinical services, conducted research, directed psychology internship and fellowship programs, contributed to public policy and aging, and had leadership roles in professional organizations. He is on the faculty of the Dept. of Geriatrics and Palliative Medicine, Icahn School of Medicine at Mount Sinai in New York City and also the Department of Counseling and Clinical Psychology, Teachers College, Columbia University.
